Shipping Plugins Only Set

Please find full instructions for installing this plug-in set in the Of Note blog post [Working sets, My Plugins, and curated plug-ins in Sibelius](#). More compact installation instructions can be found here.

This set consists of the text file of plug-in names *Shipping Plugins Only.txt*.

To install this file you must have previously installed the downloadable plug-in *My Plugins* (category *Other*).

Shipping Plugins Only.txt is a set of the names of shipping plug-ins, which will already be installed on your machine. There is no need to install additional plug-ins.

Run *My Plugins*. Choose the *Customize* button, then the button *From file of plugin names*, and navigate to the text file of plug-in names and click on *Open*.

Choose OK and you should see the plugin names in the *My Plugins* List, and you can run any of these plug-in by typing the 1-character shortcut or selecting a list entry and clicking on *Run Plugin*.

Once *My Plugins* is installed, you should keep track of where it was installed or create a keyboard shortcut for it in *File > Preferences*.

The plug-ins in the list are:

Add Chord Symbols
