Using the Browse Wildcards Plugin

Zob Bawalich May 29, 2022

Browse Wildcards finds and lists selected Text, System Text and Lyrics objects containing wildcards. Wildcards in Sibelius begin with **\$** and end with \, for example, \\$Title\.

When a wildcard is edited, you will see the $\$ formatting, but when the text is not in edit mode, it displays the text that the wildcard refers to. See **Section 5.15** – **Wildcards** in the **Sibelius Reference** for more details.

Available Wildcards

A number of wildcards replace the wildcard text with the contents of a field in the File>Info tab of the Ribbon.

Show info for:	Full Score	~	
	below may be used in text i op of the first and subseque	n your score or parts. For example, Part Name It pages of your parts.	
Title:		Part name:	
Title - Bob Is Great		Full Score	
Subtitle:		Dedication:	
Mini Title		To the one I love	
Composer:		Lyricist:	
Ima Composer		Ima Lyricist	
Arranger:		Copyist:	
Yora Arranger		Weera Copyist	
Artist:		Publisher:	
Wares de Artist		Who da Publisher	
Instrument chan	ges:		
Copyright:			
Copyright 2022			
Opus number:	Composer's	dates: Year of composition:	
This is some oth	er information		

These are:

\\$Title\	\\$Subtitle\
\\$Composer\	\\$Arranger\
\\$Artist\	\\$Copyright\
\\$PartName\	\\$InstrumentChanges\
\\$Lyricist\	\\$Copyist\
\\$Publisher\	\\$Dedication\
\\$OpusNumber\	\\$ComposerDates\
$\$	\\$MoreInfo\
\\$PartName\	

If you change the corresponding **File>Info** field, the new value will appear in any wildcards that refer to that field. In Sibelius Ultimate 2022.5 or later, you can also edit the value of a wildcard in place, when in edit mode you see something like **\\$Title=MyTitle**\. Changing the text following the **equals** sign will update the **File>Info** values as if you had changed them directly.

These additional wildcards are also available:

\\$HeaderPartName\, \\$HeaderInstrumentChanges\, \\$DateShort\, \\$DateLong\, \\$Time\, \\$User\, \\$FilePath\, \\$FileName\, \\$FileDate\, \\$PageNum\, \\$NumPages\

These are "Read-only", and refer to properties in the score that you cannot change directly. **Browse Wildcards** will indicate whether a wildcard is editable or Read-Only.

The Browse Wildcards Plugin

Browse Wildcards - Version 01.07.00 - by Zob Bawalich				
Choose a wilcard from the list and you will see where its containing Text/SystemText/Lyrics object is located in the score.				
OK will select the object containing the wildcard in the score and bring it into view. Cancel will leave the original selection unchanged.				
The plugin will only look at selected objects. Select the entire score to be sure	you find all the wildcards.			
Wildcard text Page\Spagenum\ of \Snumpages\ \SDateLong\ \SDateShort\ \SFilePatk\ \SFilePatk\ \SFilePath\ \SHeaderInstrumentChanges\ \ShtumPages\ \SPaceNum\	Wildcard Text properties from list Staff: Piano (b)/Piano Bar: 7 Beat: 1 Beat: 1 Type: Text Style: Technique Displayed text: (Read-Only) 9:22:39 AM has come Sunday, May 29, 2022 or 5/29/2022			
\SFartName\ \SFirme\ \SUser\ \Spacenum\ \Stime\ has come \Sdatelong\ or \Sdateshort\	Trace wildcard text locations Filter Wildcards and Close Cancel OK			

Why it was written

It has never been obvious from looking at a score whether text is produced with a wildcard. This plugin will help you locate the wildcard text in your score. It can also filter the wildcard text objects, and you might do something like color them temporarily to make it obvious where wildcards are being used. You would likely want to filter them again and remove the color before printing.

What it does

The plugin looks at selected text and builds a list of the wildcard text in each object (this will not include the equals sign and any following text). If you click on an item in the list box, you will see a description block that gives its score location, and the text item will be brought into view in the score. You will probably need to move the plugin dialog out of the way to see the score.

\\$NumPages\	Wildcard text SComposer\ SDateLong\ SDateShort\ SFileDat\ SHeaderPartName\ SInstrumentChanges\	Wildcard Text properties from list Staff: Almglocken/Almglocken Bar: 7 Beat: 1 (0) Type: Text Style: Technique Displayed text: Ima Composer
--------------	--	---

In addition to showing the location for the wildcards, you can write the contents of the list to the plugin Trace Window, and **Filter Wildcards and Close** will select all the text objects the plugin found, and close the dialog.

Browse Wildcards can be installed directly in Sibelius by going to **File > Plug-ins > Install Plug-ins**. It is found in the **Engravers' Tools** category.
